

In Chapter 4, on p.94, the figure should be replaced with the following:

Figure 4.5 Scatterplot of the log-transformed corpus frequency of the target word (lemma), residualized against word length, and the Voice Onset Times, split up according to whether or not the target word had been mentioned by a participant in the preceding completion task. Each circle represents one observation; the lines represent linear regression lines with a 95% confidence interval around it.
