

Iconicity as a mediator between verb semantics and morphosyntactic structure

A corpus-based study on verbs in German Sign Language

Author: Marloes Oomen

The dissertation is based primarily on an analysis of 58 dialogues between signers in German Sign Language from the DGS Corpus. The video files and basic annotation files, including sign glosses and translations, were created by the DGS Corpus team and can be found at:

https://www.sign-lang.uni-hamburg.de/meinedgs/ling/start_en.html

The linguistic annotations, added by the author for the specific purposes of the dissertation, can be accessed at:

<https://doi.org/10.21942/uva.9778556>

A summary of the dissertation in German Sign Language, produced by yomma GmbH, can be found at: <https://doi.org/10.21942/uva.11335712>
